

REJECTED HOMEWORK

A capital R in the marks spreadsheet indicates that a Homework assignment was rejected. A Homework assignment was rejected if required views were missing or content is not correct. A rejected homework assignment is treated as if never handed in, which means the weight is transferred to the weight of the final exam. You did NOT get zero, but instead will receive a grade proportional to the mark you get on your final exam. For example, if you get 75% on the exam, you will receive the equivalent of 1.5 out of 2 on the rejected homework assignment.

Rejected Homework assignments are returned. Ask your instructor.
