

CSE4411 fall 2007

Assignment #1: Due October 24, 2007, 2 pm

Weight 2.5%

This assignment involves working with file structures (chapters 8, 9, 10, 11 of textbook).

Exercise 1: do exercise 9.14 from the textbook.

Exercise 2: do exercise 9.20 from the textbook.

Exercise 3: do exercise 10.2, questions 1, 2, 3 from the textbook. Assume that rotations, when applicable, are done with respect to the right sibling.

Exercise 4: do exercise 10.6, questions 1, 2 from the textbook.

Exercise 5: do exercise 11.7 from the textbook.

How to submit your assignment:

- Drop your report in the drop box for 4411, found outside the department main office (CSE building).
- Have your name and student number clearly written on the first and every other page of your assignment.
- You can either write by hand, or typed. Typed preferred. If written by hand, please write very legibly. Figures can be drawn by hand.
- Keep a copy of your assignment (if you like) since the submitted copies will need to be kept for the department's archives for this year.

If fail to submit

If, for whatever reason, you fail to submit this assignment within the deadline, the weight of this assignment will be automatically transferred to your final exam. If you submit this assignment, but receive a failing or otherwise undesired mark, the mark that you receive will remain.
