Dept. of Computer Science and Engineering
CSE2031 – Software Tools
Exercise 1

1. Write a C program to display the second largest number of the input. The input is from the keyboard. The first integer is the number of the integers read, followed by that number of integers. After reading them all, the program should display the second largest integer

2. Write a C program to display the binary representation of a short int on the monitor. Your program reads one single short int from the keyboard, then it displays the binary representation of that int on the monitor followed by a new lines
