

Q&A for assignment 4

Newer items on the top:

Q. In question 3, can we assume that the list/ input/ file are not empty?

Yes, you can assume that they are not empty, containing valid input.

Q. Can we have free variables in our functions?

No, don't use free variables. It is bad programming style, and there are ways to avoid them.

Q. For question 2, can we assume the lists of numbers in each row are of the same length?

Yes, you can assume the inputs are matrices; therefore there will be the same number of elements in all rows.
