Second level

Title

Third level

Winter 2014 ♦ Tues, Mar 25, 2014

## Objectives

- Are you able to create a UML Class Diagram and an UML Object Diagram for the codebase?

## Review/Recap

- Distinguish between the UML Class Diagram and the UML Object Diagram
- For UML Class Diagrams, how are each of the following denoted:
  - abstract classes
  - interfaces
  - utility classes
  - plain old, regular classes
- How are each of the following relationships denoted: IS-A, HAS-A, USES
- How are static methods and fields denoted?

3

## Task

- start with photo of partial class diagram that was drawn during class today
- redraw the class diagram with better formatting, allowing enough space to show the HAS-A and USES relationships

4
