

Lecture 7

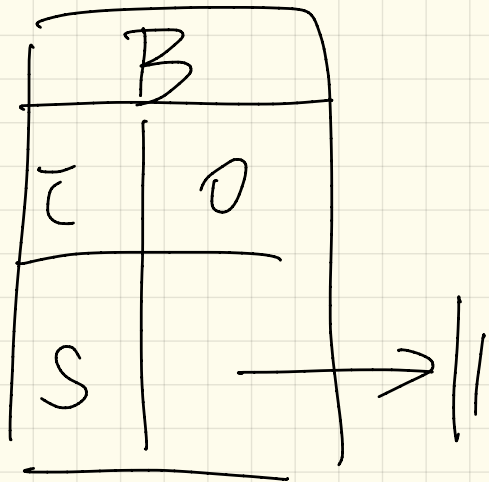

Monday Oct. 2

$$eb1 = eb2$$

eb2. change  $\bar{c}$  (15)

eb1

Single-choice principle  
When there's only one a single place to be updated.

create a. make

arr1 := a.new\_once\_array("Alan")

address of  
this object  
is cached.

arr2 := a.new\_once\_array("Mark")

class A

create { B }  
make

only class B  
can create an  
instance of A.

feature { B }  
make

only class B  
can call make.
