

Lecture 12

Monday Oct. 23

my' phone : IOS

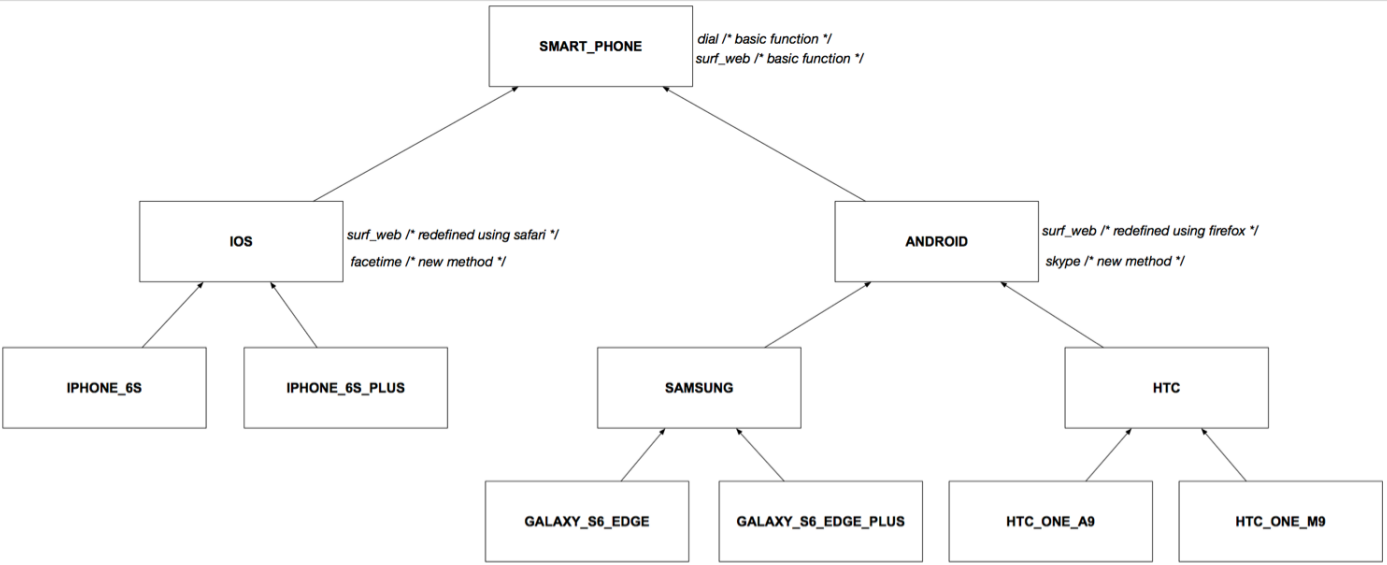

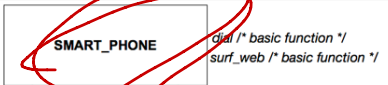

Is the following cast compatible?

check attached {ANDROID} my_phone as android then

end . . .

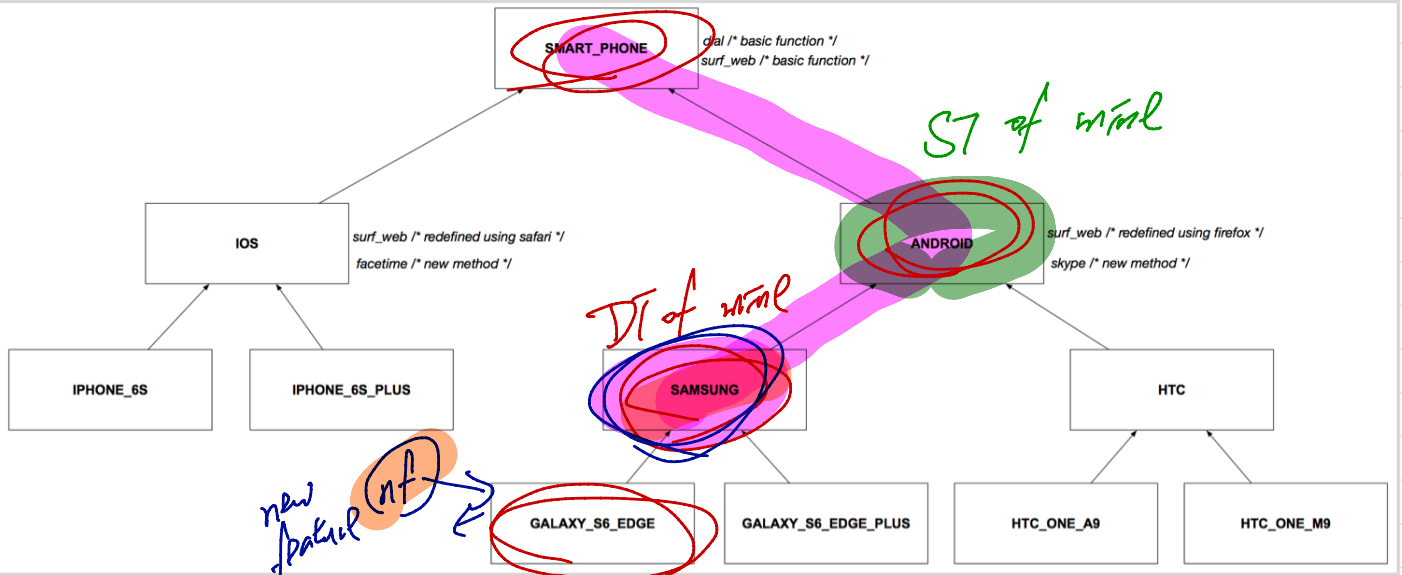

my-phone: IOS

mine: ANDROID

Give name
you can't
cast more
info.

Rule:
name you
should
mine into
one
IP's
ancest.

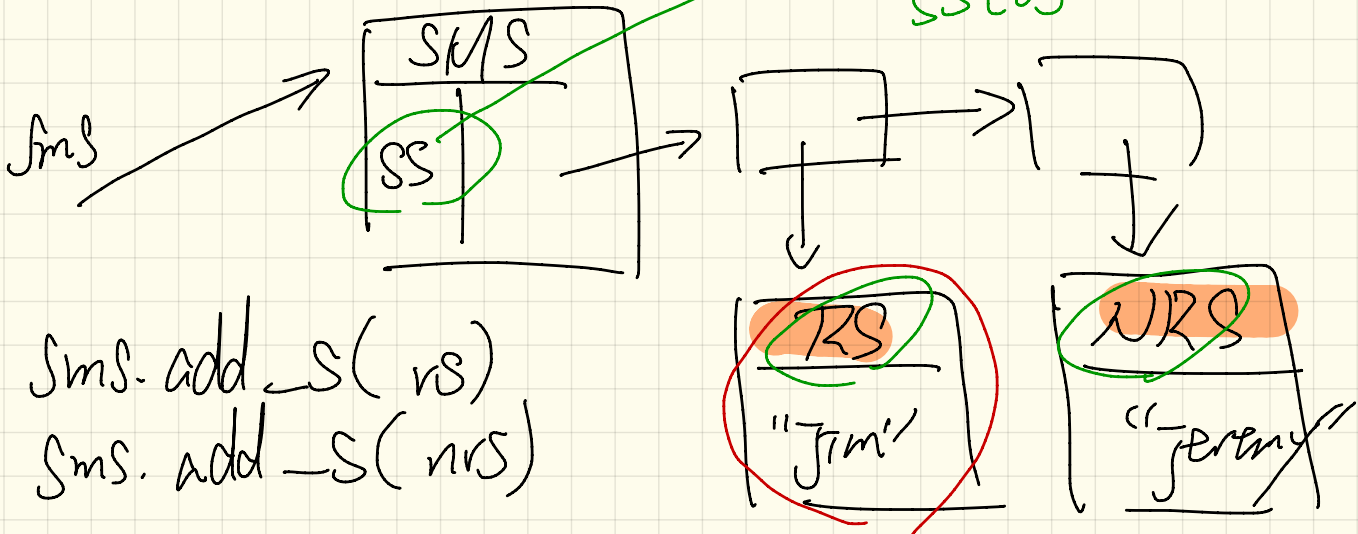

check attached {G-S6-E} (mine) as P then

end -
 contradicted in expert beliefs
 P: nf DT does not support ST of P: G-S6-E
 this case was allowed:
 1. DT of P remains SAMSUNG
 2. Temp. ST of P: G-S6-E
 => P: nf

add_s (s: STUDENT)

add_rs (rs: RS)

ST of SS [] is STUDENT

Sms.add_s(rs)

Sms.add_s(nrs)

S-MS

get-student (i: INT) - STUDENT

end

ST of return value
of get is

Sms. get-student (i). tuition (1)

_____ . ~~set-pr~~ (2)

_____ . set-drv (3) ✓
