

EECS1022 Programming for Mobile Computing
(Winter 2021)

Q&A - Lectures W3

Monday, February 1

Example Solutions

↳ vs. your solution.

Prog. Test 1

Lab1
Lab2

- Utilities
 - TestUtilities
- mandatory
- implement methods
- some tests

↳ more tests to grade
submission

a. more junit
tests.

(⇒ you should try
more input value
on tests)

b. App.java

DeMorgan Law of Conjunction: Example (3)

```
if (i < 0 && i > 10) { /* Action 1 */ }  
else { /* Action 2 */ }
```

- When is *Action 1* executed? *false*
- When is *Action 2* executed? *true* (i.e., $i \geq 0 \mid\mid i \leq 10$)

$$\underline{\underline{!(\bar{i} < 0 \ \&\& \ \bar{i} > 10)}}$$

$$\underline{\underline{= \bar{i} \geq 0 \ \mid\mid \ \bar{i} \leq 10}}$$

True

$$\textcircled{1} \quad \neg(a \underline{\underline{\wedge}} b) \equiv \neg a \underline{\underline{\vee}} \neg b$$

De Morgan

$$\textcircled{2} \quad \neg a \wedge \neg b \equiv \neg(a \vee b)$$

```

/*
 *
 */
public static String getArea(double r){

```

3~4

"..."
 ↳ A was
 ↳ B was
 ↳ tre

```

String result = "";

```

1. Read the comment for method (problem).

2. Go JUnit tests (5 ~ <10).
 ↳ test_01.

```

→ if (r < 0){
    result = "Error --";
}

```

failure trap
 ↳ expected vs.

Given: 5 tests.

Addition: 4 tests.

3 tests

return result; ↳ actual - scan code

3
 5+4

}

App. Java

Structure of code

↳ x
marks?

Debugger

⇒ use it when you have no clue.

DP

$$int\ x = \frac{i * i}{i + i + 1}$$

$x = \underline{\underline{4}}$

DP

boolean isPositive (int i)

U.-isPositive (2) \rightarrow T

-4

0
