Administrative Issues

EECS4315 Z: Mission-Critical Systems Winter 2023

CHEN-WEI WANG

Instructor

- How may you call me?
 "Jackie" (most preferred),
 "Professor Jackie", "Professor", "Professor Wang", "Sir", "Hey", "Hi", "Hello"
- When you need advice on the course, speak to me!
- There will be a <u>bonus</u> opportunity for you to fill out an informal, anonymous *midterm course survey* during the reading week.
- Throughout the semester, feel free to suggest ways for helping your learning.

If You Are Not Enrolled Yet

- Send me an email ASAP requesting access to the course eClass site, with your name, student number, Passport York ID.
- Still keep up with the study materials.
- Still complete assignments and tests (no extension).

Mask Policy

- As of now, the university does not require us to wear masks.
- However, for the safety of your instructor and classmates, please <u>do</u> consider:
 - Wearing a mask
 - Minimizing talking if you decide not to wear a mask
 - Minimizing the consumption of food or drink
- When you visit my office in-person, I'd be grateful if you can wear a mask.

Class Protocol

- Talking
- Using mobile phones
 - ⇒ *distracting*, *disrespectful* to everyone
- If you cannot stop talking or using mobile, please leave to do it.
- Slides are self-contained, so I may not read them off.
- I will focus on core concepts, examples
- Your engagement is the key: ask questions!

Writing E-Mails to Your Instructor

- Think of me as your colleague who is happy to help you learn.
 - o formality is unnecessary
 - o courtesy is expected
- This sounds very rude (and may be delayed, if not ignored):

```
On the link you sent us for our mark my mark for lab0 did not appear on it and i submitted lab0 during my lab session
```

• This sounds *much nicer*:

```
Hello Jackie, the link you sent didn't work. I did submit my lab0. Could you please look into this? Thanks! Jim
```

Course Information

- A single eClass site:
 - LE/EECS4315 Z Mission-Critical Systems (Winter 2022-2023)
 - Announcements
 - Labs

[instructions only]

Written Tests

Check your emails regularly!

Required Study Materials

 Lecture materials (recordings, iPad notes, slides, example codes) will be posted on my website for you to re-iterate concepts and examples:

```
https://www.eecs.yorku.ca/~jackie/teaching/lectures/index.html#EECS4315_W23
```

• The course syllabus is posted in the above lectures site.

Course Syllabus

Let's go over the *course syllabus*.

Need Accommodation?

- Please contact me via email as soon as possible, so we can make proper arrangements for you.
- We will work out a way for you to gain the most out of this course!

Becoming a Software Engineer

- How a real software developer works:
 - Programming *problems* are explained via the expected methods'
 API (input and output types) and some use cases, without visualization!
 - A set of *tests* must be *re-run automatically* upon changes.
 - Thinking abstractly without seeing changes on a physical device is an important skill to acquire before graduating.
- This course, like EECS2011, trains you for programming interviews.
 - In EECS2011, you think via concrete data structures.
 - In EECS3342/4315, you think via abstract machines (and math functions).
 - e.g., Watch *interviews at Google*: Given problems described in English, solve it on a whiteboard.

Study Tips

I attempt to record each lecture entirely:

- Not meant to be a replacement for classes!
- The purpose of recording is that you can focus on reaching maximum comprehension.
 - Ask questions!
 - Take (even *incomplete*) notes: they help when re-visiting lectures.
 - Review points which you need to *re-iterate* from the recordings.

General Tips about Studying in a University LASSO

- To do well, *inspiration* is more important than *perspiration*.
- Hard work does not necessarily guarantee success, but no success is possible without *hard work*

 \Rightarrow

- Don't be too satisfied just by the fact that you work hard.
- Make sure you work hard both on mastering "ground stuffs" and, more importantly, on staying on top of what's being taught.
- Go beyond lectures (e.g., look for more examples in other resources).
- Be curious about why things work the way they do.
- Always reflect yourself on how things are connected.
