Q. How many PO/VC rules for model m1?

Visualizing Invariant Preservation in Refinement

Each **concrete state transition** (from w to w') should be simulated by an **abstract state transition** (from v to v')

PO of Invariant Establishment in Refinement

Components

$K(c)$: effect of **abstract** init

$L(c)$: effect of **concrete** init

Rule of Invariant Establishment

$$\frac{A(c)}{\vdash J_i(c, K(c), L(c))}$$

Exercise:

Generate Sequents from the **INV** rule.
